

Protective and Cosmetic Surface Coatings

## SURFACE PROTECTION FOR INDUSTRY

Unicoatings™ delivers unique industrial coatings and solutions that protect assets and commercial interests.

We specialise in the research, development and manufacture of sustainable coating products and treatments. These are used daily, worldwide in endless applications, such as rail infrastructure, buildings, marine and special projects, across multiple market sectors.

Our customers rely on Unicoatings products and solutions to protect their assets. They recognise that this can maintain the integrity of their treated product, extend its life and reduce cleaning and maintenance costs. At times, it can even enhance their product's functionality.

### CURIOSITY

One of our key company values is curiosity. Our people challenge the status quo, are knowledgeable, approachable and always willing to research new challenges and, as long as there is a benefit to the customer, not just settle for conventional solutions.

#### OUR APPROACH

In the coatings industry, where every application can be slightly different, flexibility is key. We understand the challenges our customers face and, with our in-depth technical knowledge and application expertise, we tailor our service to each customer's individual requirement.

#### ENVIRONMENTAL RESPONSIBILITIES

We recognise our environmental responsibilities and continually work to develop innovative products and technical solutions with an ever-lower environmental impact.

#### DISTRIBUTOR NETWORK

Unicoatings is distributed and supported internationally by a network of approved partners. With a rapidly growing customer base, we are currently looking for additional partners around the world, so please contact us if you would like to discuss working with us.
