

## GENERAL INFORMATION LEAFLET

### Product Information: Unicoatings™ UC POLISH PLUS

Unicoatings™ UC POLISH PLUS is a semi-permanent water-based fine polish that contains an “easy-to-clean” additive. It’s the ideal product to clean and polish a surface, restore it to its original colour and then apply a coating to the surface that maintains the polished effect on a semi-permanent basis. All this in one simple working method.

UC POLISH PLUS creates an ultra thin and friction-resistant seal that acts as a protective barrier against outside influences. Treated surfaces are then much easier to clean and fresh dirt finds it harder to accumulate by virtue of the “easy-to-clean” additive. Chemical cleaners or detergents are no longer required to keep the surface clean.

UC POLISH PLUS is suitable for use on glass-fibre GFK, stainless steel, carbon materials, chrome and painted surfaces. It is the perfect polish for window frames, sectional doors, railway carriages and boats.

#### TECHNICAL DATA

Aqueous solution with cleaning additives.

#### APPLICATION

- Do not dilute the product. Shake the container well. The two phases should be mixed completely. Work at a temperature between 5°C to 35°C.
- When applying to sensitive surfaces scratching might occur; therefore test the product on a small section of the surface to be treated.
- First, clean the surface of any dirt, dust or soiling, ideally using UC CLEANER. Then, using a cloth that is dry and fuzz-free, gently apply a small amount of UC POLISH PLUS in a circular motion. Allow to dry for 5-10 minutes and then remove any excess polish and dirt with a polishing cloth
- For a maximum gloss finish and long-lasting effect, we recommend a prior treatment with UC POLISH
- Following treatment, treated surfaces can easily be kept clean from dust and dirt by simply wiping with a damp cloth or sponge
- Do not apply wax to a treated surface
- When the effect of the polish eventually wears off, simply refresh by the method outlined above

#### PACKAGING

UC POLISH PLUS is available in 0.5kg bottles, and in 5kg or 10kg canisters. For other sizes or forms please contact Unicoatings.

#### COVERAGE RATE

Approximately 32-48m<sup>2</sup> per kg.

#### STORAGE

UC POLISH PLUS can be stored for at least 24 months in its original packaging. Protect from frost and direct sunlight.

#### **LABELLING / TRANSPORT**

No dangerous goods according to ADR/RID/IMDG/IATAC.

#### **PHYSICAL HEALTH**

UC POLISH PLUS contains no free nanoparticles that might be dangerous to health.

#### **DISPOSAL**

Empty bottles and canisters, as well as any remaining product, must be disposed of in accordance with your country's laws and regulations.

#### **SAFETY / PROTECTION MEASURES**

When using UC POLISH PLUS please follow the instructions on the bottle / drum. The use of chemical preparations should only take place when the safety measures are observed and always out of the reach of children.
